Subject: Containers sitting on the ground :- Meeting on Thursday 11th of February 2021
Date: Sun, 14 Mar 2021 16:01:56 +1100

Deer O.C. and Directors

I am replying on behalf of the asset management team , to the request by the OC at the meeting on Thursday 11th of February 2021 .

I am personally disappointed that it has taken this long to be raised as I personally informed a director onsite last June 2020 and have also posted photos .

It is my personal view , 3 containers forming a triangle on the ground and also 2 containers near the hive one of which has batteries and inverter for the hive also on the ground .

In order to rectify the current situation my personal proposal is a mini working bee consisting of two to three people in order to whipper snip around the containers so as to create a safe working environment free from snakes , then using an authorised heavy vehicle lifting driver , lifting containers at one end at a time , placing them on TEN 2400 x 200 x 75 Redgum sleepers (to be purchased and brought to site) .

A breakdown of the proposed budget of \$ 999.00 for the mini working bee is fuel to get to and from site purchasing the sleepers (as sleepers on site are already allocated for the purchased and yet to be delivered containers completing the vehicle shelter) , fuel and oil for the whipper snipper and front end loader .

The Organising Committee would like to do something about the containers which are sitting directly on the ground. At its meeting on Thursday 11 February, the OC passed a motion requesting the Asset

Management and the Asset Manager present a plan to rectify this situation. Please provide this report and plan to ocmail@dte.com.au within 28 days.

The motion passed was "That the OC writes to the Asset Management Subcommittee and the Asset Management Facilitator requesting a report on containers which are currently sitting directly on the ground and a plan to rectify this and that if this report is not received within 28 days, the OC appoints another volunteer or group to take on this task."

Kind regards

Kathy Ernst

DTE member on behalf of the Organising Committee
