Subject: Cottage store room
Date: Mon, 5 Apr 2021 16:42:32 +1000

Dear Directors and members

This Easter break I brought down a second-hand Brownbuilt double door steel cabinet , as a gift to First Aid so they might be able to keep some suppliers onsite in a mouse-free , coolish secure environment .

However the cabinet only came with **one shelf** as it was used in a Fire Station for hanging jackets so if anyone is able to source 3 or 4 Brownbuilt shelves (898 x 402 mm) and clips that would be great .

Darrylle Ryan also brought down some great old portable chrome shelving units .

Andrew Wilkinson and myself cleaned out the old store room at the end of the cottage and redistributed the items into Boris , Peter and the wool shed so that we might use the room to store some First Aid items and bulk pantry items in there .

Because the ceiling in the store room is fibro , I chose to use the high pressure gurney to safely clean all surfaces , and have asked Peter Cruise if he might paint it in the near future to seal the fibro before we store any more items in the room .

With love* *Kevin 0408 772 759
